Shell **Mysella MA**

- Medium ash content for four-stroke engines
- Extra protection

DESIGNED TO MEET CHALLENGES

Every part of your machine or process has been meticulously engineered, so you want to use a lubricant that has been designed to ensure that your equipment is well protected and works efficiently.

The Shell Mysella range of gas-engine oils has been developed to enable equipment operators to select the oil that will deliver optimum value to their operations through

- **wear protection**
- **long oil life**
- **system efficiency**

Performance level is a relative indication only.

A MEDIUM-ASH OIL FOR STATIONARY GAS ENGINES

Shell Mysella MA is Shell's well-established, medium-ash gas-engine oil. It has been designed especially for use in engines running on sour gas, such as bio gas, sewage gas and landfill gas, where its acid neutralisation ability provides good engine protection and long oil life.

Shell Mysella MA is also suitable for engines that traditionally require a medium-ash oil to protect the valve seating area of the cylinder head.

Key data

SAE: 40; BN: 8.5; Ash: 0.9%

DESIGNED TO PROTECT

Shell Mysella MA has an acid neutralisation ability that provides good engine protection and long life, especially in sour-gas applications. Its medium ash level helps to protect the valve seats, which can assist in extending cylinder head overhaul intervals. A GE-J 312 gas engine burned landfill gas for 35,000 hours, and Shell Mysella MA helped to provide

- ***ring-belt cleanliness and low ring wear***
- ***good liner protection.***

DESIGNED FOR LONG OIL LIFE

With good oxidation resistance and an adequate base number, Shell Mysella MA is designed to help you operate your equipment for longer without interruption in both natural- and sour-gas applications.

DESIGNED FOR HIGH EFFICIENCY

Shell Mysella MA offers very good engine cleanliness owing to its superior solubility and detergency characteristics, which can enhance efficiency.

SPECIFICATIONS AND APPROVALS

Shell Mysella MA meets the requirements of the engine manufacturers below. SAE viscosity grades available: 40.

Claims and approvals	
Natural gas	**Sour gas**
Dresser Waukesha	GE-Jenbacher
GE-Jenbacher	MAN
MDE Dezentrale Energiesysteme	Rolls-Royce
MAN	
Mitsubishi Heavy Industries	

APPLICATIONS

Ideal for use in four-stroke gas engines used for power generation and combined-heat-and-power systems. Also suitable for use with engines running on landfill, bio or sewage gas, and for dual-fuel engines

REAL-WORLD VALUE DELIVERY

Mysella MA is a well-established, medium-ash gas-engine oil from Shell. It has a wide range of equipment manufacturer approvals and has been used successfully throughout the world.

FULL PRODUCT AND SERVICE PORTFOLIO

Whatever your needs or application, we can provide a full range of oils and greases, including synthetic, high-performance products and additional services.
